Education

Indian Institute of Technology, Roorkee

November 2021 – May 2025

B.Tech in Bioscience and Bioengineering

Skills

Technical: Python (Pandas, NumPy, Matplotlib), SQL, BigQuery, OpenAI APIs, Prompt Engineering, Tableau, Figma, Supabase, Next.js, Google Analytics, JIRA

Product: LLM System Design, AI Product Strategy, 0→1 Product Development, Roadmapping, PRD Writing, A/B Testing, Funnel Analytics, User Research, GTM Strategy, Stakeholder Communication, Cross-functional Collaboration

Experience

Associate Product Manager – Emversity

July 2025 – Present

- Conceptualised and shipped **EVA + EVA 2.0** — an AI-powered student screening platform (voice-based LLM interviews, full proctoring, 4-step permission flow) and a two-sided placement portal replacing a Google Sheets operation; employer CRM with tier classification, eligibility-filtered listings, drive scheduling, and a real-time placement funnel dashboard tracking 76 students and 8 companies across a live cohort.
- Shipped **EmStudio**, a 7-stage AI content creation pipeline (Subject → Objectives → Content Lab → QC Studio → Slide Studio → Video QC → Final Review) with an OpenAI-powered QC engine detecting spelling, factual, grammar, and image errors across healthcare education content — reducing manual QA effort by **60%** and maintaining a 90%+ quality score across 44 active projects.
- Architected **Socrates**, an internal AI analytics platform in two versions: a 3-layer NL-to-SQL interface (Interpreter → Intent → Semantic layer) over 7 approved database views for ops queries; and a PCA + stratified sampling pre-sales diagnostic pipeline surfacing plain-English conversion insights from thousands of sales call transcripts across 25+ centres.
- Led **VR Anatomy Simulation** — a 0→1 immersive healthcare education product. Owned market research, vendor evaluation, and product definition; collaborated with Unity developers, 3D artists, and SMEs to prototype a hospital simulation covering male and female anatomy with Learn, Test, and interactive Play modes for Nursing, MLT, and OTT programs.

Product Strategy Intern – Vedantu

May 2024 – August 2024

- Optimised data-driven lead generation funnels for ed-tech partnerships, generating **₹1.2 Cr in revenue** within 3 months by identifying high-conversion segments and reallocating budget accordingly.
- Led **0→1 product research and GTM strategy** for Vedantu's Study Abroad vertical using funnel analytics and financial modelling to validate product-market fit and design a scalable conversion framework.

Awards / Position of Responsibility

- Global Semi-Finalist – Hult Prize 2023 (Melbourne):** Top 4 globally among 100+ international teams. Led GTM strategy, supply chain planning, and unit economics for GreenThreads, a sustainable hemp fashion startup; represented India at the Melbourne Summit.
- Event Additional Secretary – Student Mentorship Program, IIT Roorkee:** Managed 240+ mentors and built structured mentor-mentee frameworks supporting the academic and personal development of incoming UG batches.
